## MAKE THE VIRTUAL TOUR A REALITY WITH THE 360 TECHNOLOGY

The innovative 360 technology allows you to experience and convey surprising emotions. Now you can independently create and manage panoramic photos in order to create virtual tours with many applications for personal and professional purposes.

Thanks to ViewMake it is possible to create a virtual tour in a few simple steps, to capture special moments, highlight your brand, offer new experiences or promote your products and services.

## A PANEL WITH PRACTICAL FUNCTIONS

**Viewmake Editor** is the specific panel that allows you to upload the panoramic shots, to view information about a selected pano and to create links that will then design the virtual tour in a few easy steps.

With Viewmake you can import virtual tours from Google Street View, create a Viewmake virtual tour from a tour published on Google or post a Viewmake on Google Street View.

# SOFTWARE DETAILS

## SHOOT AND POST

Viewmake Editor allows you to post 360 single photos or full virtual tour on Street View

## AUTO GEOLOCALIZATION

Automatically Geolocates 360 photos taken with GPS equipment

## MULTIFILE UPLOADING

It allows you to upload multiple files simultaneously, speeding up the work of photographers.

## MULTIPLE GOOGLE ACCOUNTS

The panel allows managing multiple accounts at once and uploading 360 photos from multiple accounts within the same project.

## INTERACTIVE MAP

It allows you to change the tour orientation while keeping the 360 photos perfectly connected.

## AUTO SAVE

Auto save

# SOFTWARE DETAILS

## IFRAME WHITE LABEL

Viewmake provides the iframe code to embed the Virtual Tour on multiple channels, also white-label.

## COMPATIBILITY WITH VR VISORS

System is compatible with all VR visors and Cardboard

## SHORT LINK

Possibility to create custom links.

## INTERACTIVE FOOTER

A practical tool for speeding navigation.

## EMBED

Embed on social platform or websites.

## FREE UNLIMITED PUBLICATIONS

It allows you to publish for free and unlimited on Street View, diting a maximum number of two projects at the same time.

# SPECIFIC FUNCTIONS

Should you need to hide faces and images for privacy reasons, the Viewmake Editor provides you with **BLUR**, the useful filter.

In order to hide the tripod or whatever you want to remove from the bottom of the panorama, you can use the **NADIR PATCHING** that will edit it automatically.

The panel is **MULTILINGUAL** to allow everyone to use it comfortably.

The editor allows you to **PUBLISH A VIEWMAKE ON GOOGLE STREET VIEW**. Through the panel, you can create a Viewmake tour from a tour published on Google Street View, or import virtual tours from Google Street View for any editing.

Using an **AUTOMATIC GEOLOCALISATION SYSTEM** of the 360 photos and an automatic connection, it allows to quickly create a tour without any difficulty for the photographer. The thumbnails of directional arrows of the 360 pictures will appear perfectly aligned and connected with each other.

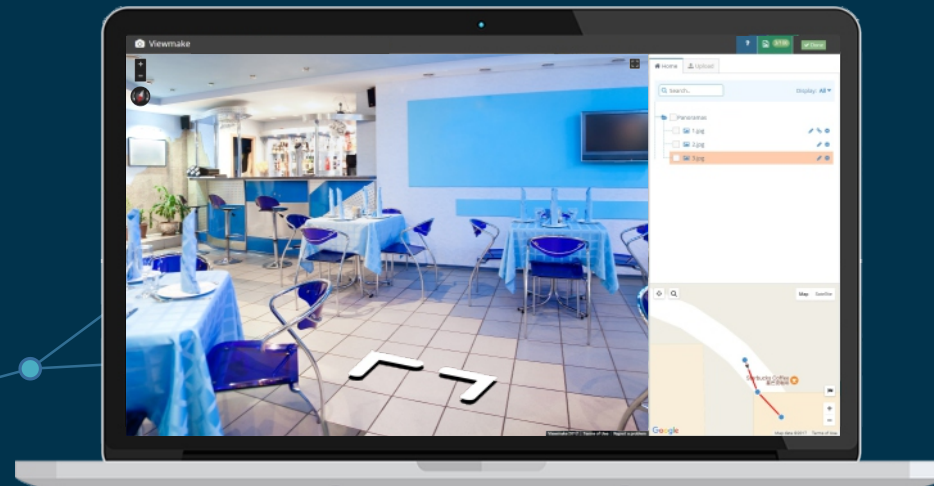

A valid **MULTILINGUAL ASSISTANCE TEAM** is always available for information, updates and insights, useful for the application of each function.

# EXPERIENCE THE FUTURE

**Access to the Viewmake Editor panel is FREE!**

If you want to enrich your work with exclusive features and make it more efficient, contact us and be part of our world!

The editor is available in the Tourmake panel and allows you to publish unlimited photo projects directly on Google Street View for free.

## EXPERIENCE THE THRILL OF THE TOUR IN VIRTUAL REALITY

Involve users actively and make them protagonists in the scene. The innovative Viewmake panoramic technology allows you to view environments through VR visors by stimulating the perception of an effective virtual reality.

The visor used to explore a Viewmake, allows you to live a unique and totally immersive experience, while transforming your smartphone into a lens useful to navigate into the virtual path.

## DISCOVER THE ADVANCE FEATURES: AN IMMERSION IN VIRTUAL REALITY WHICH DOES NOT DIERGARD FUNCIONALITY

The platform developments allow you to **walk along virtual tours through VISORS and discover a new interactive menu**, different in shape and centrally positioned for an easier visualisation.

The VR Advanced feature applies not only to Viewmake created autonomously with our system, but also to Viewmake tours created in **Google Street View** spaces. Just access the tour via the browser to navigate among spaces and enhance the thrill of Virtual Reality
